SELECTED PROBLEM STATEMENT

PS 2 — Entrepreneurship & Employment

Theme: Connecting Talent, Ideas, and Opportunities

Sangam

Where talent, ideas and opportunities meet.

Proof, not promises.

ONE-LINE SOLUTION

Sangam connects job seekers, entrepreneurs, startups, mentors and recruiters on one verified network. Recruiters are scored on hires that candidates confirm, ideas are tested with community polls, and every student gets a free AI path to the skills that openings demand.

BUILT ON THE FOUR PROMISES OF PS 2

- 01 Connect
- 02 Discover opportunities
- 03 Build skills
- 04 Ideas → ventures

TEAM NAME

CAMBIA-REGLAS

TEAM MEMBERS

HIRE-PROOF

92% match for you

6 of 6 hires confirmed

Stipend paid on time

No fee asked

AI Skill gap: TypeScript → free 2-week path, then a proof task from Pixel Labs.

Illustrative preview with sample data

Problem

Talent, ideas and opportunities already exist, but they sit on separate apps and nothing proves which offers are real.

PROBLEM STATEMENT · PS 2

“Create a platform that connects entrepreneurs, job seekers, startups, mentors and recruiters, helping them discover opportunities, build skills and turn ideas into ventures.”

ON A REAL CAMPUS

- Applications go out on many portals; most never get a reply.
- A “paid internship” asks for a training fee before day one.
- A student founder has an idea, but no co-founder, no mentor and no way to test demand.

TARGET USERS

PRIMARY USERS

Students & fresh graduates

Job seekers and student founders, every branch

“Is this recruiter real?” “Am I ready for this role?” “Will anyone use my idea?”

ALSO SERVES

Startups & recruiters
Find proven talent; earn a verified-hiring badge

Mentors & alumni
Guide the right students; build a public track record

T&P cells, E-cells, incubators
Placement and venture outcomes in one dashboard

EXISTING GAP

01 **Scattered across apps**
Jobs on Naukri, internships on Internshala, hackathons on Unstop, co-founders on WhatsApp. No single place.

02 **Hiring claims go unchecked**
“We’re hiring” and “paid internship” are never verified, so ghost jobs and fee scams look like real offers.

03 **Skills don’t match openings**
Students can’t see the exact gap between their profile and a role, or a free way to close it.

04 **Ideas die untested**
Student founders have no fast way to test demand, find a co-founder or reach a mentor.

05 **Reviews without proof**
Recruiter and startup reviews are hearsay; nothing proves the reviewer applied or worked there.

93%
of Indian job seekers saw suspected job scams
Indeed survey, Jul 2026

51%
aren’t confident they can spot a fake recruiter
Indeed survey, Jul 2026

56.35%
rated employable; over 4 in 10 aren’t job-ready

2.23 lakh
DPIIT-recognised startups · 23.36 lakh jobs
DPIIT, 31 Mar 2026

THE GAP — Today’s platforms list opportunities. None of them prove which ones are real, or get students ready for them.

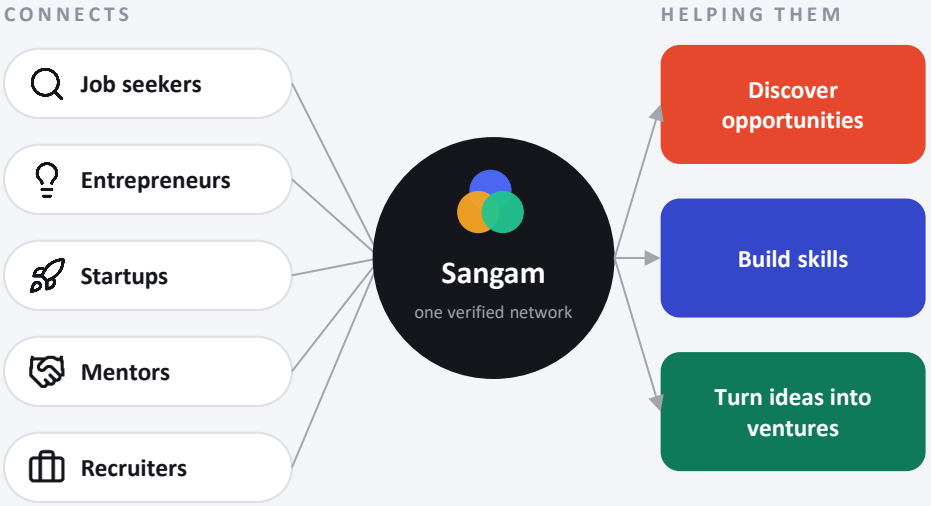

Proposed Solution

Sangam: one verified network where all five players of PS 2 meet, and talent and ideas turn into jobs and ventures.

SOLUTION OVERVIEW

Everyone builds one smart profile and picks a role. An AI feed matches each person to openings, co-founders and mentors, and explains why. If a student isn't ready, Sangam shows the exact skill gap and a free path to close it. Founders test ideas with community polls before building. Every recruiter carries a Hire-Proof Score, built from hires that candidates themselves confirm.

HOW SANGAM MAPS TO PS 2

KEY FEATURES

CONNECT

One profile, five roles

Job seeker, founder, startup, mentor or recruiter. A college or company email unlocks a verified badge.

DISCOVER OPPORTUNITIES

AI opportunity feed

Jobs, internships, gigs, hackathons, co-founder calls and govt schemes, ranked by match % with reasons.

BUILD SKILLS

Skill-Gap Coach

Compares you with the role you want, then gives a free 2-week path (NPTEL, SWAYAM, YouTube) and a proof task.

IDEAS → VENTURES

Idea Lab

Post an idea, get an AI lean-canvas critique, then match co-founders, mentors and Startup India schemes.

COMMUNITY

Q&A and feedback

Ask recruiters, mentors and alumni before you apply. Useful answers are upvoted and stay searchable.

COMMUNITY

Live polls

"Would you use it?" and "Would you pay?" for ideas; "Was the interview fair?" after hiring rounds.

TRUST

Recruiter Reality Check

Hires claimed vs hires confirmed by candidates. Unproven or fee-asking listings are flagged.

REVIEW

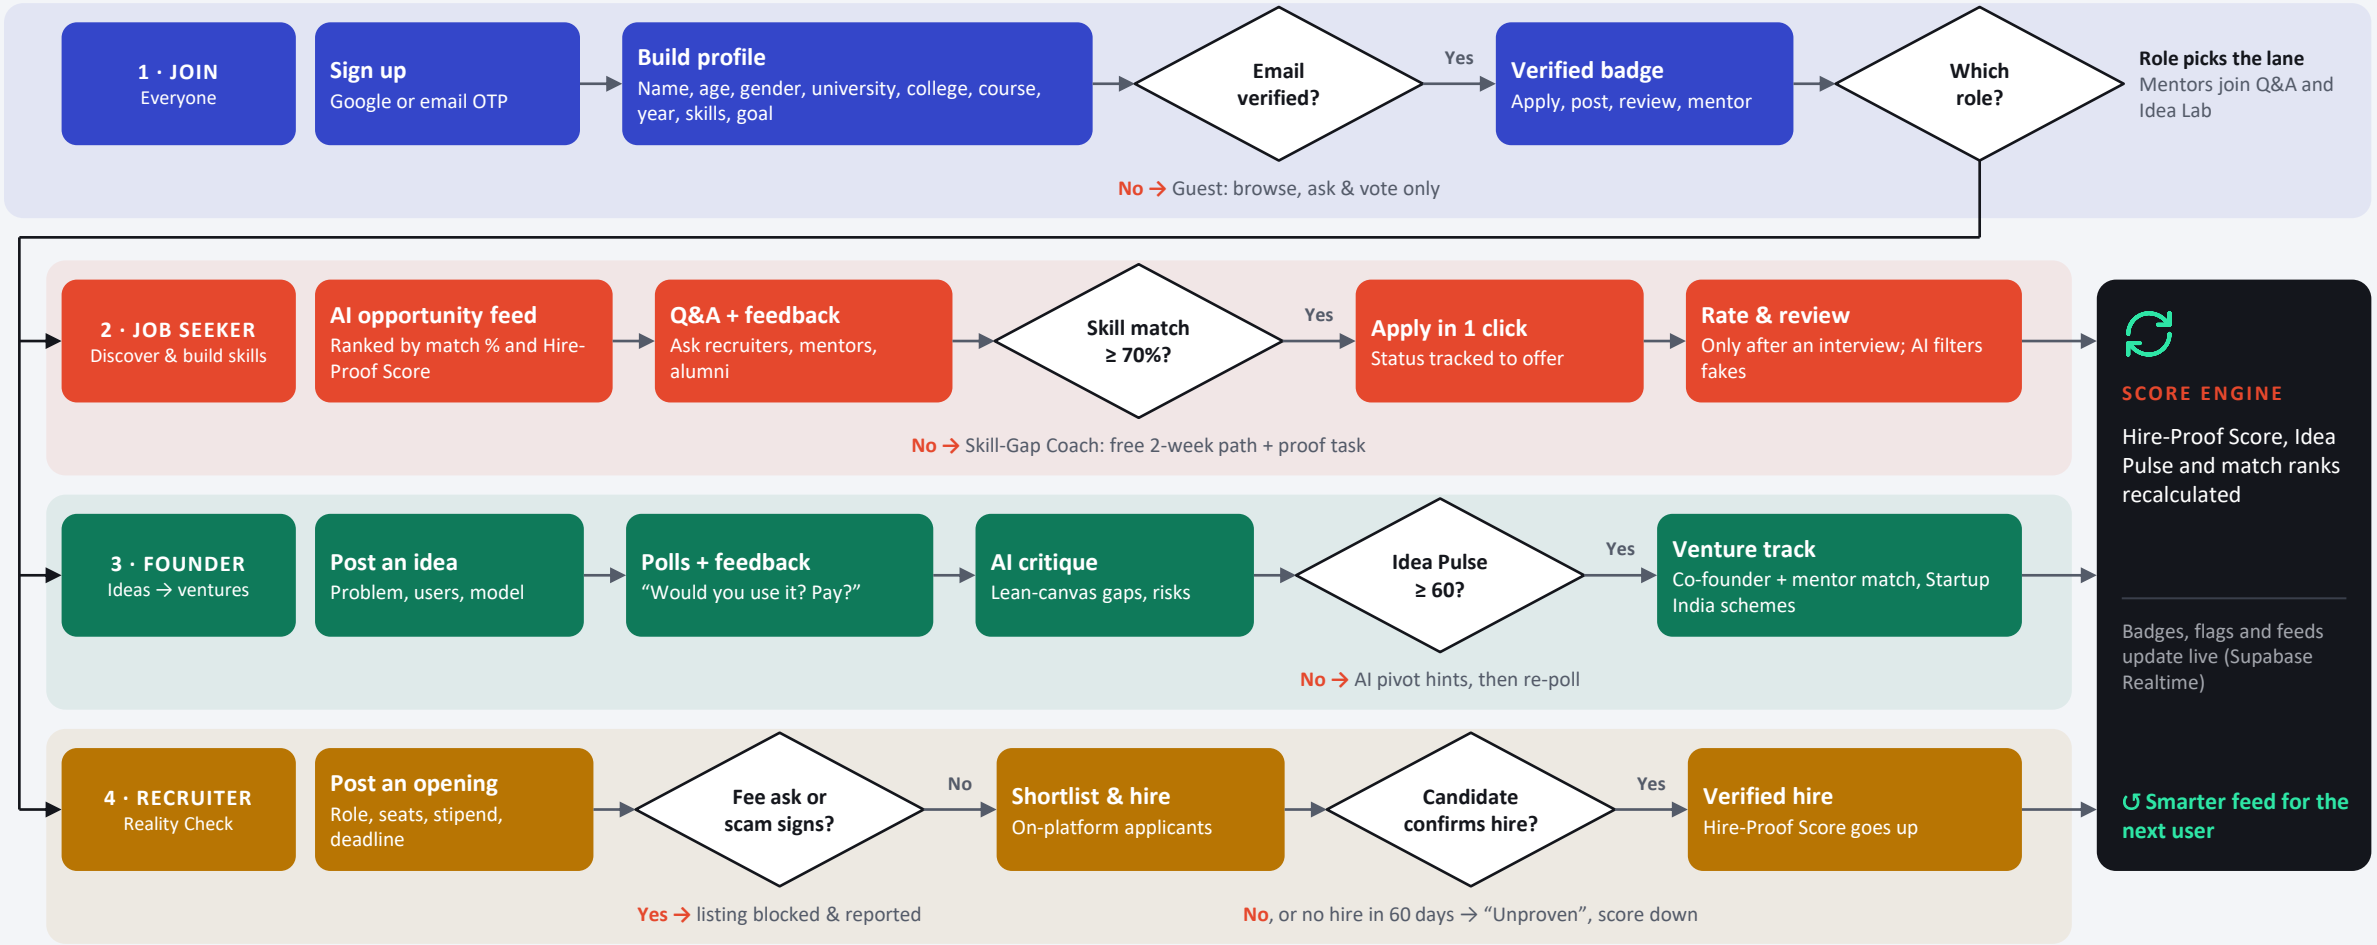

Verified reviews

Only people who applied, interviewed or interned can rate a recruiter, startup or mentor.

AI ASSIST Match reasons, skill paths, idea critique, scam and ghost-job filter, fake-review guard and review summaries.

Solution Flow

Every step and every rule (if / else), from sign-up to a verified hire or a validated venture.

Technology / Tech Stack

100% free and open-source: we build the MVP in the hackathon round and run the campus pilot at ₹0 a month.

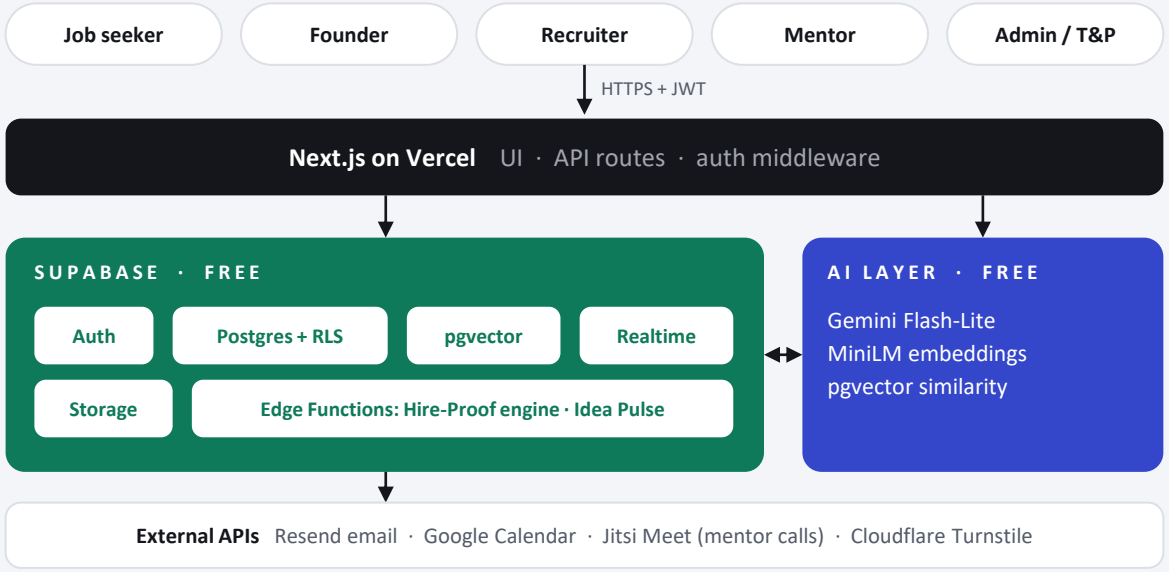

TECH STACK

EVERY LAYER IS FREE OR OPEN SOURCE

Frontend Mobile-first; installs like an app	Next.js (React), Tailwind CSS, shadcn/ui; installable PWA	FREE
Backend Serverless, so no server bills	Next.js API routes + Supabase Edge Functions (Hire-Proof engine, 60-day hire checks via pg_cron)	FREE
Database Relational data, AI search, live updates	Supabase PostgreSQL + pgvector, Realtime (live polls, Q&A), Storage (resumes, offer proofs)	FREE
Auth & security Rules enforced inside the database	Supabase Auth (Google OAuth + college / company email OTP), Row-Level Security, JWT, Cloudflare Turnstile, DPDP consent	FREE
AI layer Matching, coaching, moderation	Gemini API free tier (Flash-Lite) + open-source MiniLM embeddings via Transformers.js, pgvector search	FREE
Deployment One-command deploys from the CLI	GitHub → Vercel Hobby (vercel --prod), Supabase CLI migrations, GitHub Actions CI, Cloudflare SSL	FREE

₹0 / month for the campus pilot. Vercel Hobby, Supabase Free (500 MB database, 50,000 monthly users) and the Gemini free tier cover a one-campus pilot.

ARCHITECTURE / WORKFLOW

Hire check flow: recruiter marks a hire → candidate confirms → Edge Function recalculates the Hire-Proof Score → feeds update live.

AI / ML / APIS

Smart match: profile ↔ job embeddings + reasons
Skill-Gap Coach: missing skills → free 2-week path
Idea critique: lean-canvas gaps, poll questions
Scam filter: fee asks, personal UPI, reposts
Review guard: fake / abusive reviews, summaries

HIRE-PROOF SCORE (0–100)

35% Hires confirmed by candidates
20% Applicants who got a reply
15% Stipend paid as promised
15% Verified reviews (Bayesian)
10% Identity: domain, CIN / GSTIN
5% Recent activity

Innovation & Impact

Not another job board: Sangam is a trust layer that proves which recruiters, openings and ideas are real.

USP

01
Hire-Proof Score
Recruiters are rated on hires that candidates confirm, not on claims.

02
Ideas tested before they're built
Polls and feedback score each idea; ideas that pass unlock co-founder matching.

03
Skill gap → proof of skill
Every "not ready" becomes a free 2-week path and a startup-set task that beats a CV.

04
One network, all five players
Job seekers, founders, startups, mentors, recruiters: one profile, one trust system.

HOW WE DIFFER

	LinkedIn /	Internshala / Unstop	WhatsApp groups	Sangam
All five PS 2 players in one network	Partly	Partly	Partly	**Yes**
Hires confirmed by the hired candidate	No	No	No	**Yes**
Recruiter score from real outcomes	No	Partly	No	**Yes**
Fee / scam listings auto-flagged	Partly	Partly	No	**Yes**
Idea polls → co-founder + mentor match	Partly	No	Partly	**Yes**

EXPECTED IMPACT

Job seekers
Fewer wasted applications, no fee scams, and a clear path from "not ready" to "hired".

Founders
Validate an idea in days, then find a co-founder and a mentor in one place.

Startups & recruiters
Proven talent instead of CV piles, and a Verified Hiring badge that draws serious applicants.

Colleges · T&P · incubators
Placement and venture outcomes, ready for NAAC and NIRF reporting.

SCALABILITY

Serverless (Vercel + Supabase): one campus to hundreds, with no new servers
Multi-campus: each college gets its own space; openings are shared across campuses
Fast at scale: indexed Postgres + pgvector keep matching quick
Multilingual: English, Hindi and regional languages through AI translation

BUSINESS / IMPLEMENTATION POTENTIAL

- Free forever for students and founders
- Recruiter Pro: verified badge, talent search, analytics
- Campus dashboard for T&P cells, E-cells, incubators
- Sponsored listings: labelled, never change scores

ROLLOUT
1 Pilot on our campus
2 Colleges in our university
3 National network

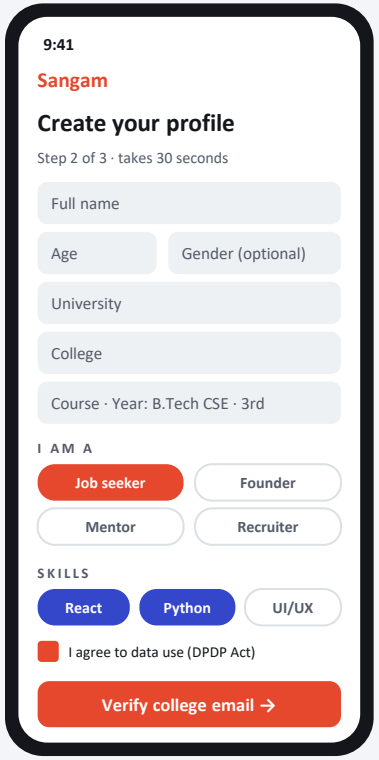

SEMESTER-1 PILOT TARGETS
1,000 students · 50 recruiters · 100 ideas

Prototype & Execution

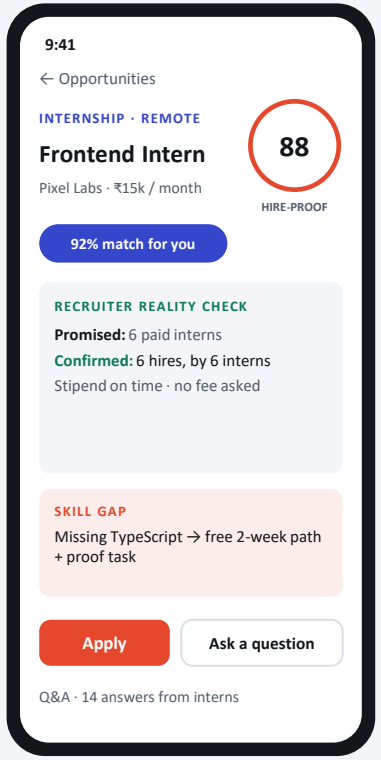

Wireframes ready and scope locked: this is exactly what we build in the hackathon round.

WIREFRAMES / PROTOTYPE

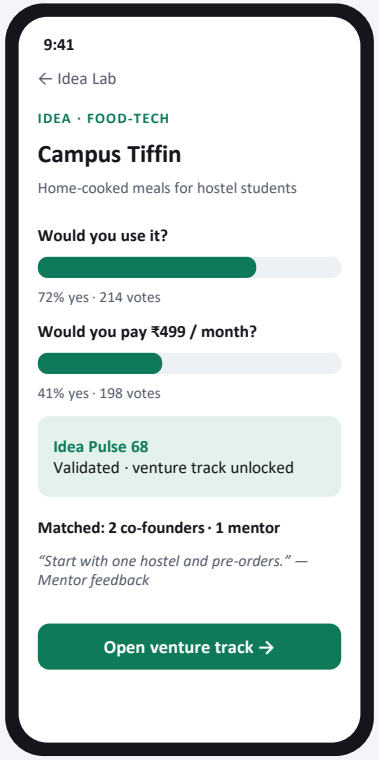

Low-fidelity · sample data

1 Sign-up & profile
Verified email, DPDP consent, role and skills

2 Opportunity page
Hire-Proof Score, match %, skill gap, Q&A

3 Idea Lab
Polls, Idea Pulse, co-founder and mentor match

IMPLEMENTATION PLAN

Now
Schema, wireframes, repo + CI ready

→

24-hour round
Working MVP built and live on Vercel

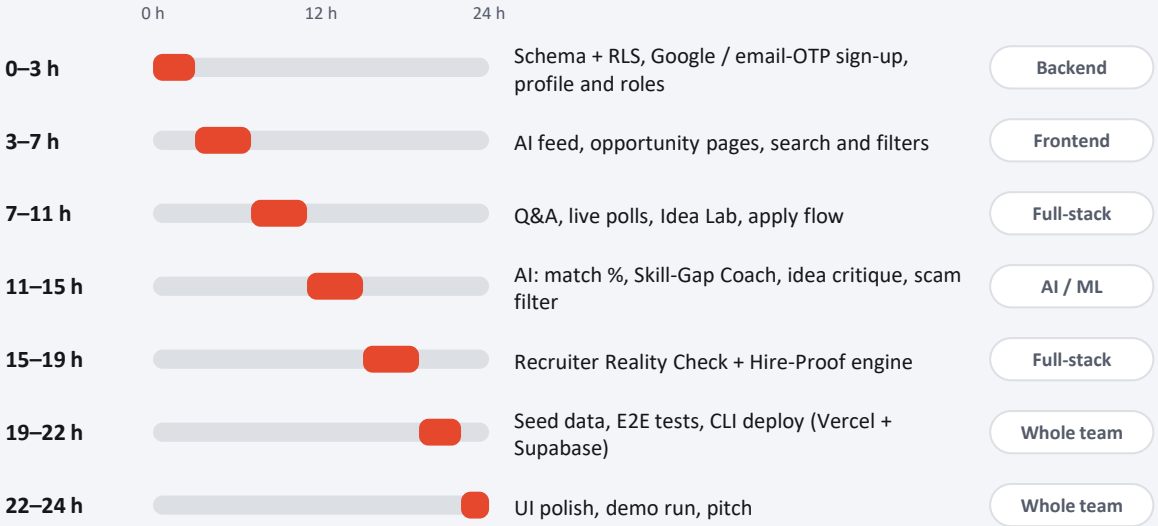

→

Month 1
Campus pilot with our T&P and E-cell teams

→

Month 3+
More colleges, Recruiter Pro, incubator tie-ups

WHAT WE WILL BUILD IN THE 24-HOUR ROUND

DEMO PATH Sign up → verify → AI feed → skill gap → apply → recruiter marks hire → candidate confirms → Hire-Proof updates live → post idea → poll → validated
